LIGHTING

Our newest canopy innovation is modular in concept. Unparalleled in it's versatility, our new 14 light canopy offers the customer the ability to make a multitude of head or pendant placement variations and at the same time cover any unused and unsightly open ports. We have designed a simple half dome that covers up to 10 ports on the canopy. Simply screw on the half dome and decoratively cover a port if you desire. For example, if you want to change your 14 light canopy to a 10 light application simply cover any 4 ports you desire.

Model CPEJRT14		HAL halogen lamp LED LED lamps
Finish	Lamp	
PC	LED	
SN satin nickel PC polished chrome		

See an example below of port being covered in which you make a custom zig zag design placement.

Powered by 2 x 150 watt electronic transformers you can go as low as only using 4 of the 14 ports.

We also can offer the canopy for LED applications.

Finally a solution for your customer that does not necessitate purchasing several different canopies when one will do the job of several!!!!
